IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Town of Saratoga.

Our water system failed to monitor for lead and copper samples at the tap. These samples are routine samples, and there was no emergency. However, as our customers, you have a right to know what happened and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health based standards. During the June 1 to September 30, 2022 monitoring period, we did not monitor or test for the required ten lead and copper tap water samples, and therefore cannot be sure of the quality of your drinking water during that time.

What should I do? There is nothing you need to do at this time. **What is being done?** Samples were submitted after the required time and the test came back within normal limits.

For more information, please contact Mayor Chuck Davis at 307-326-8335 or PO Box 486, Saratoga, WY 82331.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Town of Saratoga.
