Across the country, up to 25 percent of patients recovering from heart failure will be readmitted to the hospital within 30 days of discharge. Wyoming Medical Center wants to change that. We are one of just 35 hospitals in the country selected to participate in the Patient Navigator Program led by the American College of Cardiology, with support from AstraZeneca. This pilot program will support a team of caregivers to help patients overcome challenges during their hospital stay and in the weeks following discharge, ensuring patients don't have to come back to us too soon.
