### CONSENT AGENDA

Commissioner Espy moved to approve the consent agenda noting any item could be removed for separate action. Clerk Bartlett noted the consent agenda includes the March 5, 2024, regular meeting minutes; monthly receipts from Clerk of District Court in the amount of \$5,475.00 and Carbon County Clerk in the amount of \$14,040.25. Vice Chairman Moore seconded and the motion passed unanimously.

### ELECTED OFFICIALS & DEPARTMENT HEADS

#### Building and Grounds

Commissioner Espy moved to waive procurement and approve the proposal from Dynamic Controls for HVAC repairs at the Carbon County Detention Center. The proposal includes an estimate of

\$29,597.00 for items that need replaced and \$6,807.00 for rewiring and programming for a total of \$36,404.00. Commissioner Johnson seconded and the motion passed unanimously. Commissioner Espy moved to waive the procurement policy as the formal bidding process wasn't completed although informal quotes were received and approve the estimate from Mighty Ducks in the amount of \$34,000.00 for duct cleaning at the Carbon County Detention Center. Vice Chairman Moore seconded and the motion passed unanimously.

### Clerk

Vice Chairman Moore moved to reappoint Barbara Moss and Helen Weiland to the Carbon County Senior Services Board for 3-year terms expiring March 2027. Commissioner Irene seconded and the motion passed unanimously.

Commissioner Irene moved to approve the Memorandum of Understanding between Carbon County and Carbon County Public Health for a Community Support and Prevention Specialist who will perform the services as set forth in the contract with WY Dept. of Health concerning the Substance Abuse Prevention Program, Tobacco Prevention and Control Program, and the Injury and Violence Prevention Program for community based alcohol, tobacco, opioid, other drugs and suicide prevention in Carbon County. Commissioner Espy seconded and the motion passed unanimously.

### Attorney

Commissioner Johnson moved to approve Judicial Dialog Systems Software Licensing Agreement in the amount of \$49,700.00 subject to legal approval and authorize any commissioner to sign. Vice Chairman Moore seconded and the motion passed unanimously.

Vice Chairman Moore moved to authorize the Chairman's signature on the Letter to Republic Service voiding the Customer Service Agreement for trash service at the Hanna Senior Center. Commissioner Espy seconded and the motion passed unanimously.

### EXECUTIVE SESSION

Commissioner Espy moved to go into executive session at 10:22 a.m. with Clerk Bartlett, Lenny Layman, Matt Webster and Ashley Mayfield Davis to discuss personnel, potential litigation and other matters considered confidential by law. Vice Chairman Moore seconded and the motion passed unanimously. Matt left the session at 10:31 a.m. and Lenny joined. Lenny left at 10:46 a.m.

Commissioner Espy moved to come out of executive session at 11:10 a.m. noting no action was taken and that the minutes be signed and sealed. Vice Chairman Moore seconded and the motion passed unanimously.

### ADJOURNMENT

Commissioner Espy moved to adjourn the meeting at 11:58 a.m. Vice Chairman Moore seconded and the motion passed unanimously.

A regular meeting of this Board will be held Tuesday, April 16, 2024, at 2:00 p.m. at the Sinclair Town Hall located at WY-76, Sinclair, WY. The public is invited to attend, or you can listen online at the website listed below. To get on the agenda, call the Clerk's Office by the Thursday before the meeting. Per Wyo. Stat. §18-3-516(f), access to county information can be obtained at [www.carbonwy.com](http://www.carbonwy.com) or by calling the Clerk's Office at (307) 328-2668 or 1-800-250-9812.

**CARBON COUNTY COMMISSIONERS  
PUBLIC LEGAL NOTICE**

Notice is hereby given that the Carbon County Board of County Commissioners will hold a public hearing on the following case file on Tuesday, May 7, 2024, at 11:30 a.m., at the Carbon Building-Courthouse Annex, 2nd Floor-Commissioners Meeting Room, located at 215 West Buffalo Street, Rawlins, Wyoming.

**Z.C. Case File #2024-04:** Request for a Zone Change from Ranching, Agriculture and Mining (RAM) to Forestry Production and Seasonal Recreation (FPSR-11.18) on approximately 11.18 acres. The FPSR Zone is intended to be applied to areas of the County in which timber production and seasonally accessible recreation uses are the desirable predominant uses.

**Petitioners:** Arrow Shield Land and Cattle, LLC (Applicant and Land Owner)

**Parcel Identification Number:** 16871830001000-Parent Parcel  
**General Site Location:** Approximately 35 miles south of Rawlins off Carbon County Road #401 (Sage Creek Road) on the west side.  
**Legal Description:** A parcel of land located in Lot 12 of Section 18 and Lot 1 of Section 19, T16N, R87W of the 6th P.M., Carbon County, Wyoming being more specifically described as follows: Commencing at the Southwest Corner of Section 18, as monumented with a 2012 BLM brass cap; Thence S02°21'35"E, along the West line of said Section 19, a distance of 1325.25 feet to the North Sixteenth Corner of said Section 19; Thence N89°51'25"E, along the South lines of Lots 2 and 3 of said Section 19, a distance of 2034.67 feet to the Southwest Corner of said Lot 1, of Section 19, and the Point of Beginning; Thence N89°51'25"E along the South line of said Lot 1, of Section 19, a distance of 576.60 feet to the intersection of the South line of Lot 1, of Section 19 and the centerline of County Road 401, said point being the Southeast Corner of the herein described parcel; Thence N12°13'22"W, along the centerline of County Road 401, a distance of 176.79 feet; Thence along the centerline of County Road 401, 31.53 feet along the arc of a curve deflecting to the left, said curve having a radius of 207.81 feet, and a long chord which bears N16°34'03"W, a distance of 31.52 feet; Thence N20°55'18"W, along the centerline of County Road 401, a distance of 1184.15 feet; Thence along the centerline of County Road 401, 512.36 feet along the arc of a curve deflecting to the right, said curve having a radius of 1643.80 feet, and a long chord which bears N11°59'33"W, a distance of 510.29 feet to the Center-West centerline of Section 18, said point being the Northerly Corner of the herein described parcel; Thence S00°18'53"W, along the Center-West centerline of Section 18, a distance of 490.64 feet to the West Sixteenth Corner common to Section 18 and Section 19, as monumented with a 2023 aluminum cap; Thence S00°03'37"E, along the Center-West centerline of Section 19, a distance of 1319.03 feet to the Point of Beginning. Said parcel of land contains 11.18 acres, more or less, and is subject to any easements, restrictions, and/or reservations of record.

For additional information, please call the Carbon County Planning and Development Department, (307) 328-2651.

**Notice of Tax Deed Application**

Jon Ostling is going to apply to the Carbon County Treasurer for a tax deed to certain real property located in Carbon County, Wyoming. The applicant purchased said real property pursuant to tax sale on the 13 th day of August, 2023.

Said real property was taxed in the name of John Schmidt, C/O T and J Machine Works whose address was listed as: 908 E 14th St, Scottsbluff, NE 69361. The legal description for the real property for which the applicant intends to apply for a tax deed is as follows, to wit: 202 Front St, LOT 9 BLK 4 Hanna (OT) (BK 656/206) Tax Code 0252 .

The property has been taxed and assessed for the years 2018, 2019, 2020, 2021, 2022 and 2023. Said tax having been paid by the applicant and the redemption period on the or after 8th day of July 2024.

Said application for tax deed will be made to the Carbon County Treasurer not less than three (3) months after the last date of this notice. To the best knowledge and information of the applicant there are not special assessment for local or public improvements made for said properties.

Saratoga CCR 2023

**Is my water safe?**

We are pleased to present this year’s (2023) Annual Water Quality Report (Consumer Confidence Report) as required by the Safe Drinking Water Act (SDWA). This report is designed to provide details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. This report is a snapshot of last year’s water quality. We are committed to providing you with information because informed customers are our best allies.

**Do I need to take special precautions?**

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

**Where does my water come from?**

The Towns drinking water is supplied by five groundwater wells located approximately three miles east of the Town limits. The five wells range in depth from 305 feet to 430 feet below ground surface and are completed in the North Park Formation.

**Source water assessment and its availability**

Information and questions on the Towns source water can be obtained at Town Hall.

**Why are there contaminants in my drinking water?**

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency’s (EPA) Safe Drinking Water Hotline (800-426-4791). The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity: microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses; organic Chemical Contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems; and radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

**How can I get involved?**

The Saratoga / Carbon County Impact Joint Powers Board meetings are held at 6:00 PM every second Wednesday of the month at the Platte Valley Community Center. Members of the public can attend and ask questions and receive information regarding the Towns Public Water System during these meetings.

**Description of Water Treatment Process**

Your water is treated by disinfection. Disinfection involves the addition of chlorine or other disinfectant to kill dangerous bacteria and microorganisms that may be in the water. Disinfection is one of the major public health advances of the 20th century. The Town of Saratoga’s drinking water system is only treated with chlorine.

**Water Conservation Tips**

Did you know that the average U.S. household uses approximately 400 gallons of water per day or 100 gallons per person per day? Luckily, there are many low-cost and no-cost ways to conserve water. Small changes can make a big difference - try one today and soon it will become second nature. Take short showers - a 5-minute shower uses 4 to 5 gallons of water compared to up to 50 gallons for a bath.

Shut off water while brushing your teeth, washing your hair and shaving and save up to 500 gallons a month.

Use a water-efficient showerhead. They’re inexpensive, easy to install, and can save you up to 750 gallons a month.

Run your clothes washer and dishwasher only when they are full. You can save up to 1,000 gallons a month.

Water plants only when necessary.

Fix leaky toilets and faucets. Faucet washers are inexpensive and take only a few minutes to replace. To check your toilet for a leak, place a few drops of food coloring in the tank and wait. If it seeps into the toilet bowl without flushing, you have a leak. Fixing it or replacing it with a new, more efficient model can save up to 1,000 gallons a month.

Adjust sprinklers so only your lawn is watered. Apply water only as fast as the soil can absorb it and during the cooler parts of the day to reduce evaporation.

Teach your kids about water conservation to ensure a future generation that uses water wisely. Make it a family effort to reduce next month’s water bill!

Visit [www.epa.gov/watersense](http://www.epa.gov/watersense) for more information.

**Source Water Protection Tips**

Protection of drinking water is everyone’s responsibility. You can help protect your community’s drinking water source in several ways:

Eliminate excess use of lawn and garden fertilizers and pesticides - they contain hazardous chemicals

that can reach your drinking water source.

In 2020 the Town, with assistance from the Wyoming Association of Rural Water Systems, adopted a Source Water Protection Plan. The plan is an active document that evaluates potential threats to the Towns source water (well field), and established actions that can be taken to evaluate potential threats, and corrective actions that could be implements to protect the Towns source of drinking water. Potential contamination sources to the Towns water system is very limited due to the well field remote location.

Pick up after your pets.

If you have your own septic system, properly maintain your system to reduce leaching to water sources or consider connecting to a public water system.

Dispose of chemicals properly; take used motor oil to a recycling center.

Volunteer in your community. Find a watershed or wellhead protection organization in your community and volunteer to help. If there are no active groups, consider starting one. Use EPA’s Adopt Your Watershed to locate groups in your community or visit the Watershed Information Network’s How to Start a Watershed Team.

Organize a storm drain stenciling project with your local government or water supplier. Stencil a message next to the street drain reminding people “Dump No Waste - Drains to River” or “Protect Your Water.” Produce and distribute a flyer for households to remind residents that storm drains dump directly into your local water body.

**Monitoring and reporting of compliance data violations**

There was one (1) compliance violation during the year 2022. The violation was for not monitoring for Lead and Copper between the months of June and September 2022, a time frame set forth by EPA regulation. How every, the Town of Saratoga did monitor for these contaminants during the month of October 2022. Those results are presented in this report.

**Significant Deficiencies**

The Towns last sanitary survey identified that the screen mesh covering the top air vents on both one million - gallon tanks were not equipped with #24 mesh; the vents were screened but not with #24 mesh. The Town replaced the air vent (with #24 mesh screens) atop the welded tank in May 2021. EPA requested modifications to the air vent atop the welded tank in the fall of 2021. These modifications were completed, and the air vent significant deficiency was dropped. The last item identified in the survey was that leaking was present at locations on the bolted tank. The tank was drained and taken out of service in December 2020. The Town evaluated if the tank was necessary for the continued operation of the Towns water system. A decision to take the tank out of service permanently was made in the fall or 2021. The final step in taking the bolted tank our of service will be to physically disconnect the tank feed line from the Towns water system. This was completed in the first quarter of 2022.

**Additional Information for Lead**

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Town of Saratoga Wyoming is responsible for providing high quality drinking water but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epain.gov/safewater/lead>. The Town last collected Lead and Copper samples for pre-selected locations in 2022. The Town will next collect lead & copper samples in 2023. Revision to EPA’s Lead and Copper Rule will require public water systems to inventory service lines (water main to private homes or businesses) for the presence of lead lines. This inventory will be required to be completed by the Town by September 2024. Residences may see activities associated with this inventory process over the next year.

**Additional Information for Arsenic**

The Town of Saratoga did sample for Arsenic in December of 2022, as part of the Inorganic compounds. The results show a None Detect. EPA’s standard balances the current understanding of arsenic’s possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

**Water Quality Data Table**

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of contaminants in water provided by public water systems. The table below lists all the drinking water contaminants that we detected during the calendar year of this report. Although many more contaminants were tested, only those substances listed below were found in your water. All sources of drinking water contain some naturally occurring contaminants. At low levels, these substances are generally not harmful in our drinking water. Removing all contaminants would be extremely expensive, and in most cases, would not provide increased protection of public health. A few naturally occurring minerals may actually improve the taste of drinking water and have nutritional value at low levels. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not vary significantly from year to year, or the system is not considered vulnerable to this type of contamination. As such, some of our data, though representative, may be more than one year old. In this table you will find terms and abbreviations that might not be familiar to you. To help you better understand these terms, we have provided the definitions below the table. As per EPA’s annual monitoring and reporting requirements for the Town, in 2022 IOC’s, VOC’s, SOC’s, Asbestos, Radioactive contaminants and Lead and Cupper samples were collected. Sampling requirements for 2023 are, Disinfection Byproducts, Lead and Copper, and Nitrates. IOC’s, VOC’s, SOC’s will be done 2025, Radionuclides will be done in 2028 and Asbestos in 2031.

Contaminants	MCLG or MRDLG	MCL, TT, or MRDL	Detect In Your Water	Range Low	Range High	Sample Date	Violation	Typical Source
<b>Disinfectants &amp; Disinfection By-Products</b>								
(There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants)								
Haloacetic Acids (HAA5)(ppb)	NA	60	0.85	NA	NA	2023	No	By-product of drinking water chlorination
T T H M s [ T o t a l Trihalomethanes](ppb)	NA	80	2.9	NA	NA	2023	No	By-product of drinking water disinfection
<b>Inorganic Contaminants</b>								
Arsenic (ppb)	0	10	ND	NA	NA	2022	No	Erosion of natural deposits; Runoff from orchards; Runoff from glass and electronics production wastes
Asbestos (MFL)	7	7	ND	NA	NA	2022	No	Decay of asbestos cement water mains; Erosion of natural deposits
Barium (ppm)	2	2	.2	NA	NA	2022	No	Discharge of drilling wastes; Discharges from metal refineries; Erosion of natural deposits
Fluoride (ppm)	4	4	.6	NA	NA	2022	No	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
Nitrate [measured as Nitrogen] (ppm)	10	10	1.33	NA	NA	2023	No	Run off from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits
<b>Microbiological Contaminants</b>								
Total Coliform (TCR) (positive samples/month)	0	0	0	NA	NA	2023	No	Naturally present in the environment
<b>Radioactive Contaminants</b>								
Alpha emitters (pCi/L)	0	15	-2	NA	NA	2022	No	Erosion of natural deposits, next 2028
Uranium (ug/L)	0	30	3	NA	NA	2016	No	Erosion of natural deposits, next 2028
Contaminants	MCLG	AL	Your Water	Sample Date	# Samples Exceeding AL	Exceeds AL	Typical Source	
<b>Inorganic Contaminants</b>								
Copper - action level at consumer taps (ppm)	1.3	1.3	0.05	2022	0	No	Corrosion of household plumbing systems; Erosion of natural deposits	
<b>Inorganic Contaminants</b>								
Lead - action level at consumer taps (ppb)	0	15	ND	2022	0	No	Next Pb/Cu sampels in 2025	

**Undetected Contaminants**

The following contaminants were monitored for, but not detected, in your water

Contaminants	MCLG or MRDLG	MCL, TT, or MRDL	Your Water	Violation	Typical Source
Antimony (ppb)	6	6	ND	No	Discharge from petroleum refineries; fire retardants; ceramics; electronics; solder; test addition.
Beryllium (ppb)	4	4	ND	No	Discharge from metal refineries and coal-burning factories; Discharge from electrical, aerospace, and defense industries
Cadmium (ppb)	5	5	ND	No	Corrosion of galvanized pipes; Erosion of natural deposits; Discharge from metal refineries; runoff from waste batteries and paints
Chromium (ppb)	100	100	ND	No	Discharge from steel and pulp mills; Erosion of natural deposits
Cyanide (ppb)	200	200	ND	No	Discharge from plastic and fertilizer factories; Discharge from steel/metal factories
Mercury [Inorganic] (ppb)	2	2	ND	No	Erosion of natural deposits; Discharge from refineries and factories; Runoff from landfills; Runoff from cropland
Nickel (ppb)	None	None	ND	No	Erosion of natrual deposits; Discharge from refineries and factories; Runoff from landfills; Runoff from cropland
Selenium (ppb)	50	50	ND	No	Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines
Thallium (ppb)	.5	2	ND	No	Discharge from electronics, glass and Leaching from ore-processing sites; drug factories

# PUBLIC NOTICES

Unit Descriptions	
Term	Definition
ug/L	ug/L: Number of micrograms of substance in one liter of water
Ppm	ppm: parts per million, or milligrams per liter (mg/L)
Ppb	ppb: parts per billions, or micrograms per liter (µg/L)
pCi/L	pCi/L: picocuries per liter (a measure of radioactivity)
MFL	MFL: million fibers per liter, used to measure asbestos concentration
positive samples/month	positive samples/month: Number of samples taken monthly that were found to be positive
NA	NA: not applicable
ND	ND: not detected
NR	NR: Monitoring not required but recommended

Important Drinking Water Definitions	
Term	Definition
MCLG	MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety
MCL	MCL: Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to MCLGs as feasible using the best available treatment technology.
TT	TT: Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water
AL	AL: Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
Variations and Exemptions	Variations and Exemptions: State or EPA permission not to meet an MCL or treatment technique under certain conditions
MRDLG	MRDLG: Maximum residual disinfection level goal. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
MRDL	MRDL: Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is no convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MNR	MNR: Monitored Not Regulated
MPL	MPL: State Assigned Maximum Permissible Level

## Carbon County Sheriff's Office Arrest Report

March 29, 2024 to April 4, 2024

- March 29, 2024**
  - Mechelle Montero of Rawlins, Wyoming was arrested for probation/parole jail sanction.
  - Jonathan Gile of Rawlins, Wyoming was arrested felony possession of a controlled substance in powder/crystal form - 3rd offense and driving while license suspended - 2nd offense.
  - Humberto Marquez Loroima of Aurora, Colorado was arrested for fraud: use of false identity, possession of a controlled substance in plant form and littering.
  - March 31, 2024**
    - Jerry Beeline of Rawlins, Wyoming was arrested for driving under the influence of alcohol - 4th plus offense within 10 years and driving while license suspended - 2nd offense.
    - Keerieann Maes of Rawlins, Wyoming was arrested on a warrant.
    - Ronald Michelin of Wamsutter, Wyoming was arrested as a sentenced inmate.
    - Alexis Sessums of Rock Springs, Wyoming was arrested for possession of a controlled substance in pill or capsule form.
- March 30, 2024**
  - Maikel Alvarez of Denver, Colorado was arrested for careless driving - 1st offense, possession of a controlled substance in plant form, fraud: use of false identity, speeding and no registration & improper display of tabs.
  - Gregory Tate of Rancho Cordova, California was arrested for violation of protection order.
  - Amber Basinski of Rawlins, Wyoming was arrested for felony child abuse - response from welfare/physical injury.
  - Kevin Carlton II of Rawlins, Wyoming was arrested on a warrant.
  - Joshua Kovachevich of Rawlins, Wyoming was arrested as a sentenced inmate.
  - Serinah Pyle of Taylorsville, Utah was arrested for driving while license cancelled/suspended/revoked.
  - April 1, 2024**
    - Christopher Hennek of Saratoga, Wyoming was arrested on a warrant.
    - Javier Avila of Colorado Springs, Colorado was arrested on a holdover for another agency.
  - April 2, 2024**
    - John Marsh of Rawlins, Wyoming was arrested on a warrant.
    - Shannon Zamora of Rawlins, Wyoming was arrested for possession of a controlled substance in powder/crystal form.
    - April 3, 2024**
      - Wade Bates of Rock Springs, Wyoming was arrested on a holdover for another agency.
    - April 4, 2024**
      - Wade Bates of Rock Springs, Wyoming was arrested on a holdover for another agency.

### PUBLIC NOTICE

In accordance with the provisions of the Wyoming Environmental Quality Act and Chapter 1 of the Solid Waste Rules, the Upper Platter River Solid Waste District (District), has submitted a renewal permit application for the Saratoga Construction and Demolition Landfill. This facility provides for the disposal of construction and demolition waste which have been generated within the incorporated towns of Saratoga, Encampment, and Riverside, and unincorporated communities of Ryan Park, Walcott, and the surrounding rural areas. The 30-acre facility is located 1 and ¼ miles east of the Town of Saratoga, WY in Carbon County. More specifically, this facility is located in the SE ¼, SW ¼ of Section 8, Township 17N, Range 83W, in Carbon County, Wyoming. The total volumetric capacity of this facility is estimated to be 503,856 cubic yards. The life of the facility is estimated to be 61 years. The Department of Environmental Quality (DEQ) has reviewed the application and found it to be complete. Any interested person has the right to file comments on the permit application and the DEQ's completeness review. The period for providing comments shall begin on April 4th, 2024 and end on May 13th, 2024. Comments must be received by 5:00 PM on the last day of the notice period. Comments on this application must be submitted in writing to the Department of Environmental Quality, Suzanne Engels, Administrator, Solid and Hazardous Waste Division, 200 W. 17th Street, Cheyenne, Wyoming 82002 or submitted using the DEQ comment portal provided at <https://shw.wyomingdeq.commentinput.com/>. DEQ is now conducting a review of the application to determine if it complies with applicable technical standards for a facility of this type. If DEQ finds that the application complies with the technical standards, DEQ will issue a proposed permit and provide public notice and further opportunity to comment on the proposed permit. In accordance with the Americans with Disabilities Act, special assistance or alternative formats will be made available upon request for individuals with disabilities. ### CARBON COUNTY COMMISSIONERS PUBLIC LEGAL NOTICE

Notice is hereby given that the Carbon County Board of County Commissioners will hold a public hearing on the following case file on Tuesday, May 7, 2024, at 11:30 a.m., at the Carbon Building-Courthouse Annex, 2nd Floor-Commissioners Meeting Room, located at 215 West Buffalo Street, Rawlins, Wyoming. C.U. Case File #2024-02: Request for a Conditional Use Permit in the Ranching, Agriculture and Mining (RAM) Zone. The request is to permit an existing telecommunications tower with the overall tower height being 310 feet and related facilities/equipment.
